### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Walter L. Beavers on Thursday, August 26, 2004.

The application has been amended as follows:

Canceled claims 4, 5, 6, 9, 11, 14, 16, and 18.

Claim 1. A bait station comprising: a horizontal pest channel, a vertical bait tube, said pest channel affixed to said bait tube and in fluid communication therewith, a flexible planar shroud, said shroud defining a central opening therein, said bait tube positioned in said shroud opening for covering the pest channel, an anchor, first and second anchor guides attached to said bait tube, said second anchor guide attached to said bait tube below said first anchor guide, said first and second anchor guides aligned along said bait tube for maintaining a common anchor, each of said first and second anchor guides comprises an eye bolt, said anchor slideable within said eye bolts, whereby said shroud can be hidden with ground cover to camouflage said bait station while said bait tube remains readily accessible and is stabilized while said pest channel remains negotiable to a pest.

Art Unit: 3643

Claim 7, line 1, replaced "4" with --1--.

Claim 12, line 1, replaced "9" with --1--.

Claim 19. A method to eradicate yard pests using an inverted t-shaped bait station comprising a substantially vertical bait tube with a removable cap, the bait tube normally intersecting a pest channel and in fluid communication therewith, a flexible planar shroud with a central opening for receiving the bait tube so the shroud substantially covers the pest channel, a pair of anchor guides affixed to the bait tube along its length and which are aligned with each other and are parallel to a its vertical axis of the bait tube, an anchor that slideably passes through the pair of anchor guides for securing the bait station to the ground and maintaining a desired orientation, the method comprising the steps of:

- a) placing the bait station on the ground whereby the pest channel contacts the ground surface and the bait tube is normal to the ground near a known pest burrow;
- b) adjusting the an angle of the bait tube with respect to the ground surface to achieve the desired orientation;
- c) placing the anchor through the anchor guides and contacting the ground therewith;
- d) placing the shroud opening over the bait tube so the pest channel is completely covered with the shroud;
- e) concealing the shroud with ground cover; and
- f) baiting the bait station.

Art Unit: 3643

Claim 20, line 4, replaced "therein" with --in the bait tube--.

2. The following is an examiner's statement of reasons for allowance:

In regard to claim 1, the prior art of record does not disclose the bait station comprising each of the first and second anchor guides comprising eye bolts.

In regard to claim 19, the prior art of record does not disclose a method to eradicate yard pests using an inverted t-shaped bait station, the method comprising the steps of: placing the anchor through the anchor guides and contacting the ground therewith; and concealing the shroud with ground cover.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
